Kazakhstan Government Scholarship Committee  
Ministry of Science and Higher Education  
Republic of Kazakhstan

Dear Members of the Scholarship Committee,

My name is Muhammad Mubashir Tariq, and I am writing to express my sincere interest in applying for the Kazakhstan Government Scholarship to pursue a Bachelor's Degree in Computer Science. I am a dedicated and motivated student from Pakistan, with a strong academic background and a growing professional experience in the field of web development. I see this opportunity not only as a path to enhance my education, but also as a platform to contribute meaningfully to the global tech community and to foster international understanding between Kazakhstan and Pakistan.

I successfully completed my Higher Secondary School Certificate (Intermediate) in 2022, securing 950 out of 1100 marks (86%). During my school years, I developed a strong interest in technology and computing, which led me to pursue self-learning and practical experiences in web development. Right after completing my intermediate education, I joined a reputable web development company, where I worked from 2022 to 2025. This hands-on experience has significantly broadened my technical knowledge and professional discipline. I have had the opportunity to work on real-world projects, learn modern web technologies, collaborate in team environments, and interact with clients from diverse backgrounds.

Despite being engaged in a full-time job, my desire to pursue higher education in computer science has never wavered. I firmly believe that a structured and academically rigorous Bachelor's program will help me build a strong foundation in computer science, including data structures, algorithms, software engineering, and artificial intelligence—fields that are shaping the future. With my practical experience and academic passion, I am confident that I can excel in both theoretical and applied aspects of the program.

Kazakhstan is known for its rapidly growing educational infrastructure and commitment to fostering international cooperation in science and technology. I am particularly inspired by the country's emphasis on innovation and modernization, and I believe studying in Kazakhstan will provide me with not only a quality education but also an enriching cross-cultural experience. I am eager to engage with students from various backgrounds, participate in academic research, and contribute to the vibrant student community.

Upon completion of my studies, I intend to return to Pakistan and use the skills and knowledge gained to support the development of our technology sector. I am especially passionate about improving digital literacy, supporting startups, and mentoring young learners interested in IT and programming.

In conclusion, I believe I am a strong candidate for this scholarship due to my academic performance, professional experience, and clear motivation to advance in the field of computer science. I am fully committed to utilizing this opportunity to its fullest potential and to upholding the values and expectations of the Kazakhstan Government Scholarship.

Thank you for considering my application. I look forward to the opportunity to contribute positively to the academic community in Kazakhstan.

Sincerely,

**Muhammad Mubashir Tariq**
